Already signed up? [Sign in here.](#)

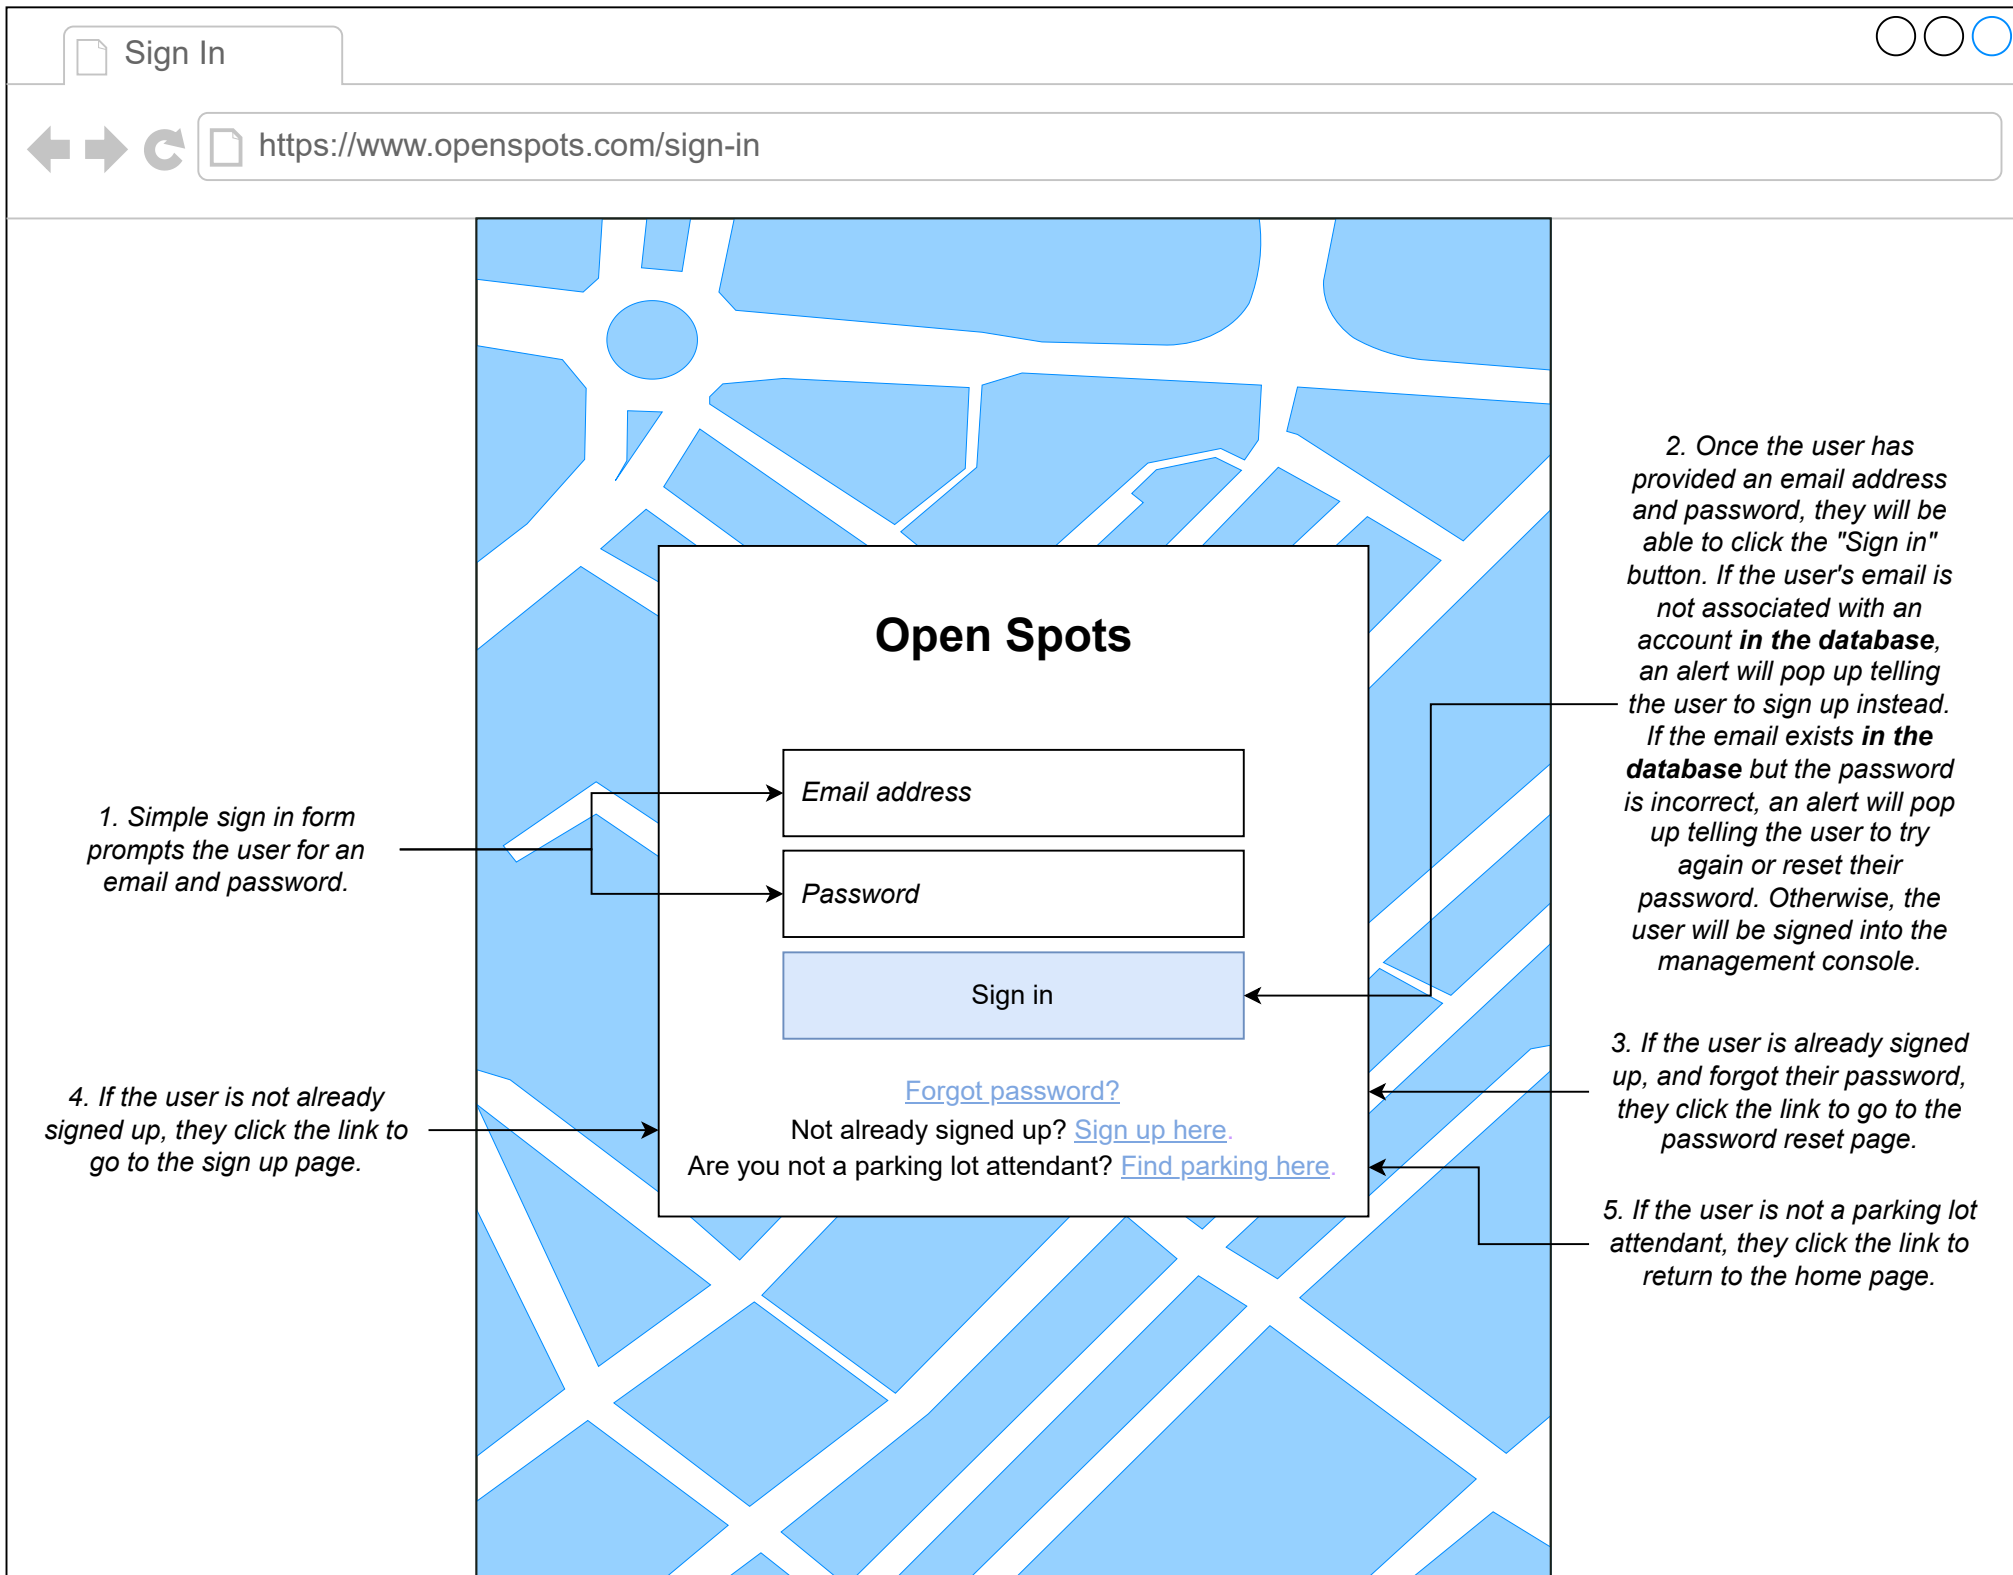

Are you not a parking lot attendant? [Find parking here.](#)

1. Simple sign up form prompts the user for an email and password. The user must enter the password twice to confirm it and will not be able to sign up if they do not match.

3. If the user is already signed up, they click the link to go to the sign in page.

2. Once the user has provided an email address and matching passwords, they will be able to click the "Sign up" button. If the user's email already exists **in the database**, an alert will pop up telling the user to sign in instead. Otherwise, the account will be created **in the database**, and the user will be signed into the management console.

4. If the user is not a parking lot attendant, they click the link to return to the home page.

Are you not a parking lot attendant? [Find parking here.](#)

1. Prompts the user for the email address associated with their account.

3. If the user is not already signed up, they click the link to go to the sign up page.

2. Once the user has provided an email address, they will be able to click the "Sign in" button. If the user's email is not associated with an account **in the database**, an alert will pop up telling the user to sign up instead. If the email exists **in the database**, the back end will send an email to the user including an authenticated link to the reset password page.

4. If the user is not a parking lot attendant, they click the link to return to the home page.

## Open Spots

1. Simple password reset form prompts the user for a new password which must be entered twice to confirm it. If the passwords don't match, an alert will pop up to tell the user.

2. Once the user has provided matching passwords, they will be able to click the "Reset password" button. This will replace the user's current password **in the database** with the new one and send the user to the sign in page.
